DECKFIELDS

SINDARE STAGE DEVELOPMENTS

DeckFields next to the well-known DJ programs

DeckFields 4.2.3 · as of 22 November 2026

DeckFields is DJ software for Mac and Windows (desktop app), with a browser version and an Android tablet version, all with one licence. Here it stands next to five well-known DJ programs, feature by feature, so you can see what DeckFields has that the others do not — and what it does not have (yet).

Signs: ✓ has it · ✗ does not have it · ~ partly, or only with extra hardware, software or another app · ? not confirmed in the sources.

Only in DeckFields

✓ **One USB stick for rekordbox, Serato, Engine DJ and Traktor players at once, written straight from DeckFields; DJ sticks and libraries of five programs read and written both ways (desktop app)**

Not found in the published features of the five others.

✓ **REC & REPLAY: record a whole set, every move of knobs, faders, effects and stems, and play it back on the decks — the faders move by themselves**

None of the five other programs does this.

✓ **PreMix Studio: pre-mix sets on a timeline, with transitions that really drive the DeckFields mixer; fine-tune recorded sets move by move; export to Ableton Live, MPC XL, Logic Pro, FL Studio and any DAW; tempo meets in the middle before each blend and glides back, like a DJ does**

Unique in this combination.

✓ **STEMS with their own effects per part: 4-band EQ, gate, compressor, delay and reverb sends, presets — and everything recorded too**

The others have stems, but with fewer or no effects per part.

✓ **MIDI timecode (MTC) to lights, video or a DAW, and the stem levels as MIDI to lights and visuals**

With the others only through extra software or plug-ins.

✓ **Each part on its own screen (decks, mixer, pads, library, MIX IDEAS, set-time screen, Song Editor)**

Unique to this extent.

✓ **Club players follow DeckFields (LEAD) and DeckFields follows the players**

rekordbox and VirtualDJ work with the players, but do not let the players follow.

✓ **Blend/mashup finder on phrases and energy per phrase**

None of the five in this form.

✓ **Pads with 4 effect corners + pad sequencer + 20 pad effects with a setup page**

Unique.

✓ **Setup page with a live picture for every Beat FX and Send FX effect, GATE FILTER on 16 steps**

Unique in this form.

✓ **Tablets as remotes: PADS, SEQUENCER, MIXER or CLOCK, several tablets at once — no app, through the browser**

Only VirtualDJ has a remote app (bought separately).

✓ **Set time: clock, elapsed and countdown of the set length, large on its own screen; last 30 s red**

Unique.

✓ **Runs as a desktop app, as one file in the browser without installation, and on an Android tablet — with one licence**

None of the five.

✓ **Licence per customer — a DJ, an artist or a company — with several computers, 30 days offline**

Handy for a DJ with a laptop and a studio computer, and for DJ schools, clubs and rental companies.

DeckFields	Traktor	rekordbox	Serato	VirtualDJ	djay
✓	✗	~	✗	~	✗

Good to know: what DeckFields does not have (yet)

✗ Streaming services (Beatport, TIDAL, SoundCloud …)
DeckFields plays the music on your own computer or USB stick: WAV, MP3, FLAC, AIFF, M4A, OGG.

✗ DVS (timecode vinyl / CD)
Scratching with real records needs another program.

✗ Ready-made mappings for every controller
The CDJ-3000 works over USB as a full deck (4.1.14); 120 controllers and players are recognised by themselves; any other MIDI controller is linked with MIDI LEARN.

✗ Free version
No free version; a demo licence is available on request.

✗ DMX straight to the lamps
DeckFields drives lights through MIDI timecode (MTC) and the stem levels as MIDI to a lighting desk or lighting program, which drives the lamps over DMX. A MIDI interface or a virtual MIDI port is enough.

✗ Live broadcasting from inside the program
You stream with OBS Studio (free); DeckFields gives OBS a now-playing card with title, artist, BPM and key, and writes the tracklist with times.

✗ Video mixing, karaoke, VST plug-ins
Not in DeckFields. Video programs can follow the MIDI timecode.

Prices per program

Other programs: as published in 2025–2026, mostly in US dollars without VAT.

DeckFields 4.2.3 — Subscription
€9.99 per month · €49.99 per 6 months · €89.99 per year (incl. 21 % VAT, beta prices) · customers of a DeckFields partner: 1 month extra free with the partner code

All DeckFields features; licence per customer (DJ, artist or company), several computers, 30 days offline · Free: No free version (demo licences by name)

PreMix (on DeckFields) — Monthly subscription on top of a DeckFields plan
Per month · per 6 months · per year:
Basic: €9.99 · €49.95 · €89.91
Stems: €29.00 · €145.00 · €261.00
  early bird €15.00 · €75.00 · €135.00
Pro: €35.00 · €175.00 · €315.00
  early bird €20.00 · €100.00 · €180.00
Early bird = the first 12 months; incl. 21 % VAT

Basic: PreMix Studio, REC & REPLAY, MIDI timecode, export to MPC XL and Ableton · Stems: Basic plus STEMS with effects per stem · Pro: Stems plus the SONG EDITOR and MASTERING (desktop app)

Traktor Pro 4 — One-off purchase
$149 · upgrade from Traktor Pro 3: $74

All features, incl. stems, Pattern Player and Ozone Maximizer; no subscription · Free: Trial version

rekordbox 7 — Subscription in 3 tiers
Core $12/mo ($120/yr) · Creative $18/mo ($180/yr) · Professional $36/mo ($360/yr, with 5 TB cloud)

Performance mode, stems, DVS, video, edit in all plans; the plans differ mainly in cloud sync and number of devices · Free: Free plan; fully free with a Hardware Unlock controller

Serato DJ Pro 4 — Subscription or one-off
DJ Pro: $11.99/mo or $299 one-off · DJ Suite: $14.99/mo or $499 one-off

Suite adds DVS, Serato Video, Pitch 'n Time, extra FX, Flip and Play · Free: Serato DJ Lite and Practice Mode free; Pro free with Pro-unlock hardware

VirtualDJ 2026 — Subscription (professional use)
Pro: $19/mo · Business: $99/mo

Pro = professional use with broad controller support; Business = business support and several users · Free: Free for home use (not when you earn money with it)

djay Pro (Algoriddim) — Free app + PRO subscription
The App Store shows PRO options of $6.99, $29.99 and $49.99

PRO unlocks all PRO features on Mac and iOS plus 1,000+ loops, samples and visuals; streaming needs its own subscription per service · Free: Free basic version
